Profile

Computer Engineering graduate (2025) specializing in **Java Backend** and **Full-Stack Engineering**. Experienced in building microservices and web applications with Spring Boot, React.js, Docker, and REST APIs. Demonstrated ability to design fault-tolerant backend architectures and integrate Generative AI APIs into production tools.

Technical Skills

Languages: Java (Core & Advanced), JavaScript (ES6+), SQL, Python **Databases & Tools:** PostgreSQL, MySQL, Git, GitHub, Maven, Postman
Backend & Cloud: Spring Boot, Spring Security, REST APIs, Spring Data JPA, Hibernate, Docker, Render
Frontend & Core Concepts: React.js, Vite, Material-UI, Chrome Extensions (Manifest V3) | DSA, OOP/OOD, SDLC

Featured Projects

GmailGenie AI – Distributed AI Email Assistant GitHub | Live API
Java 21, Spring Boot, React 19, Google Gemini API, Docker, Manifest V3, WebClient

- Engineered an email assistant with a native **Chrome Extension** (Manifest V3), a **Spring Boot** microservice, and a **React 19** UI.
- Implemented live DOM observation via JavaScript `MutationObserver` to extract threads and inject toolbar controls.
- Designed a resilient **multi-model failover algorithm** routing requests across 4 Gemini models, eliminating cloud 503/429 spikes.
- Containerized with multi-stage **Docker** builds and deployed on Render with dynamic port mapping and health checks.

TaskFlow – Collaborative Task Management System *Java, Spring Boot, JWT, PostgreSQL, React*

- Developed a full-stack task tracking platform with role-based access control (RBAC) and priority categorization.
- Implemented stateless authentication using Spring Security and JWT with refresh-token rotation algorithms.
- Designed normalized PostgreSQL schemas with Spring Data JPA/Hibernate, indexing high-frequency status queries.

Multiple Disease Prediction System
Python, Scikit-learn, Pandas, NumPy, Flask, Render

- Developed an interactive ML prediction platform assessing risks for Heart, Kidney, Diabetes, and Liver diseases.
- Preprocessed and vectorized patient diagnostic datasets using Pandas/NumPy and deployed on Render cloud.

Experience

Web Developer – ERC Club *2022 – 2023*

- Developed responsive portal features using HTML5, CSS3, JavaScript, PHP, and MySQL.
- Built an automated member registration pipeline, eliminating manual records for 200+ members.

Network & Systems Support Assistant – College Campus *2023 – 2025*

- Monitored campus network equipment (switches, routers, subnets) ensuring high uptime for 1,000+ users.
- Diagnosed Layer 2/3 connectivity and DNS/DHCP issues across institutional workstations.

Certifications & Training

Java Full Stack Development – AccioJob *(ID: db1e36)* *Sep 2025 – Jul 2026*
10-month program; solved 300+ DSA problems; built full-stack apps with Java, Spring Boot, MySQL, and React.

Education

B.E. in Computer Science – Govt. College of Engg. & Research, Avasari *(CGPA: 8.25 / 10.0)* *2021 – 2025*
HSC (Science) – Netaji Jr. Science College, Mohol *(92.83%)* *2020 – 2021*
